(54) WHEEL RIM OF UNUNIFORM THICKNESS FOR VEHICLE

(57)Abstract:

PURPOSE: To rationally distribute the thickness of a wheel rim and reduce its weight, by making the thickness of its flange corners and bottom corners larger.

CONSTITUTION: A partially thick material is rolled to manufacture a wheel rim W3, whose flange corners A, B and bottom corners required of higher strength and rigidity have a larger thickness. The thickness of the wheel rim W3 is thus rationalized to reduce its weight.

LEGAL STATUS

[Date of request for examination]
 [Date of sending the examiner's decision of rejection]
 [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
 [Date of final disposal for application]
 [Patent number]
 [Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against
examiner's decision of rejection]

[Date of extinction of right]
